

# GRAINGERS PORCELAIN WORKS

**REFURBISHMENT - WORCESTERSHIRE**  
**GRAINGERS PORCELAIN WORKS - WORCESTER**  
 Completed: July 2015

Graingers was a badly dilapidated, redundant porcelain works building which was in need of complete refurbishment. Glazzard Architects carried out the renovation works including repair of the damaged roof and first floor timbers.

The concept of the refurbishment was simple and based upon leaving intact as much as possible of the original fabric of the building, whilst inserting new contemporary elements that sit in contrast through the choice of materials and composition. The expression, rather than covering, of the layers of history within the building provides an inspiring and creative work environment.

The building received support from the Redundant Building Grant scheme and attempts to set a new precedent for office space in Worcester.
